Importance of Packaging Nowadays...

Today, there are many similar products in stores, so the market has become very competitive. Faced with such a situation, the presentation of a product by its packaging has become so important that it can determine whether the item achieves success or failure.

Packaging (packaging design) and labeling can be used by brands to attract buyers to their point of sale and end up buying the product. This design has a double facet: graphic design and structural design.

Some products packaging is given below!
