Service

China has been the 'world factory' for years. Buying quality products from qualified suppliers is crucial to an import business. But due to the asymmetric information between suppliers and worldwide buyers, it is always vital to use third party inspection services to understand the real situation of suppliers background and goods quality.

In a production circle, below are the regular inspection services involved. You can [click them to learn more](#).

Factory Audit :

Ensure the potential supplier/ factory is reliable and suitable.

Pre-Production Inspection :

Ensure your requirements are understood/ met before production beginning.

First Article inspection :

Ensure production starts correctly, it right happens at factory for the first run of production.

During production inspection :

Ensure all processes and products are being made to the agreed standards and timeframes. Timing: 10-50% of completed production.

Pre-shipment Inspection :

Ensure the products are manufactured per requirements and packed ready to ship. Timing: 100% production finished and above 80% of each item packed.

Container Loading Inspection :

Ensure the container is qualified, and all goods are well loaded and sealed in container.

Defects Sorting Service:

Ensure there are no defects among products, it is suitable for higher value of goods or after several failed inspection.

Production Monitoring:

Monitor factory production to ensure factory produces per requirements and implement right quality control.

Amazon Fba Inspection:

Besides regular points checked in pre-shipment inspection, Amazon FBA requirements will be verified.

Popular Services

Factory audit	15%
Pre-shipment inspection	70%
Container loading supervision	10%
Others	5%

Testimonials

I was very happy and impressed with my last two quality inspections for my weight plates back in November and December. Your inspections saved me a lot of frustration and time if the items were received as is.
