Ambien: the sleeping Aid

Hello to everyone. My name is Stanlee, and I'd like to tell you about my insomnia recovery journey. A period in my life that's filled with sleepless nights and bruised minds. This is the journey of how I went from being a mess to living a whole, routine life free of insomnia and its limitations.

It all started when I was in 12th class, studying all night, sacrificing my sleep to score good grades—staying up late gulping caffeine to stay awake and focused. The final exam was right around the corner, just two months away. One of my elder cousins suggested starting studying at night to get more time and concentrate easily as there was no disturbance. I stayed the whole night studying, drinking coffee, and sleeping the next day. This cycle kept on going for the next two months till my exam got over.

2months after my exam went over, I was free, relaxed, and happy but was unaware of the fact that my body's sleep cycle got used to the lifestyle I adopted. Even after my exam got over, I stayed awake all night and felt weak, drowsy, and sleepy the next day. There were even times when I used to not sleep for 2 -3 days.

I still remember that day I was settling down for the night, thinking about trying to sleep, which I hadn't had for about 60 hours but failed. I was devastated. My body was shivering, mind blown, felt dead inside, and that's where I decided to take some of the Ambien pills out of my dad's medical bag. My dad used to take Ambien as he travels a lot for work purposes and has to deal with jet lags.

Now for me, I took Ambien in limit just cause I was suffering from hell severe insomnia. I still can't forget that day. I didn't know that it would kick in pretty fast; just as I took the pill for 30-40 minutes, it started working. I felt sleepy, and after that, I don't really remember much else I did that night.

I figured I finally fell asleep around 2 or 3 am and woke up around 1 pm in the noon the next day (Best night of sleep in days, incidentally). The next morning I told my dad all about the last night and how my insomnia is making my life hell. He straight away took me to his doctor, who then prescribed me Ambien pills to help aid in treating my insomnia. And today, I am clean. I used Ambien for a short period, and briefly, that helped me suffer only a few bearable withdrawal effects.
