

Best Schools and Nurseries Photographer – Scotland: SMK Photographics

With 25 years of photography experience, SMK Photographics offer the very best in professional nursery and school photography. Long gone are the awkward and old-fashioned school photos of yesteryear; SMK Photographics is dedicated to capturing precious and personal moments as students progress through their school years. We took a closer look at what it is that makes SMK Photographics photos and service so special.

Based in Glasgow, Scotland, SMK Photographics offer wedding photography, pet portraits and so much more. However, it is their school and nursery photography that has gained them recognition in the UK Enterprise Awards 2020.

School photography captures a child's growth, capturing the year-by-year progression through an education that parents and families are able to treasure for a lifetime. Whether it be an individual portrait, full class or school photograph or producing photos to promote the school in the community, Photographics' clients are able to depend on and trust each member of their team of photographers to deliver high quality photos.

SMK Photographics do not provide the normal, old-fashioned and staged school photos we might remember from yesteryear but are dedicated to encapsulating the character of each child. It is their core value of creativity, professionalism, consistency and technical skill that sets this firm of photographers apart from their competitors. Awarded a designated certification of Licentiate Master Photographers Association, parents and clients are able to trust SMK Photographics to capture high quality photos of a professional standard. However, by using only UK lab-approved suppliers, these photography packages for families, schools and nurseries remain affordable, as well as supporting the local community.

While business may have slowed down as a result of the Covid-19 lockdown that saw most schools close at the beginning of the summer, SMK Photographics is now ready for the start of the school year, with stringent measures in place to ensure business can resume as safely as possible.

From ensuring a safe arrival on-site, to maintaining social distancing between photographers, children and

staff, dressing all employees in suitable PPE and keeping all equipment and props properly sanitised, thorough measures have been taken to ensure the safety of customers and photographers, which is the priority for all parties. The full list of measures can be found on the SMK Photographics website.

However, these new precautions will not detract from the fun process and reliable, professional service offered to schools and nurseries across Scotland. Thanks to their adaptability and enthusiasm for ensuring parents do not miss out on treasured mementos of their child's education, SMK Photographics will be able to continue offering their high quality and professional service as schools reopen.
