- Tiredness
- Headache
- Loss of balance or coordination
- Difficulty concentrating
- Vomiting
- Changes in appetite
- Skin rash
- Nausea
- Sleep problems (insomnia)
- Forgetfulness or amnesia
- Constipation

## Lorazepam And Alcohol

Consuming Alcohol works by increasing the dopamine activity in the brain by activating the neurotransmitters. Furthermore, this increase in the amount of dopamine brings about a deep sense of pleasure and reward. In fact, this sense of pleasure is the only thing that reinforces a person's drinking behavior. Additionally, if you suffer from anxiety disorder and are planning to buy ativan online, then make sure to buy it after prescription.

However, as we know Ativan works by increasing the effects of GABA ( Gamma-Aminobutyric Acid) and thus provides a calming effect to the brain that ends up in the person feeling pleased and calm.

It could also lead to addiction if taken more than prescribed.

There are some side effects of having alcohol, that include:

- Headache
- Nausea
- Drowsiness
- Lack of Coordination
- Slurred Speech
- Slow heart rate and breathing
- Mood swings

Whereas, benzodiazepines are a class of drugs that includes:

- Ativan (Lorazepam)
- Valium (Diazepam)
- Librium (Chlordiazepoxide)
- Xanax (Alprazolam)
- Halcion (Triazolam)
- Restoril (Temazepam)
- Klonopin (Clonazepam)
