## **What is Adderall Used For?**

Adderall is a combination medicine that helps in treating the symptoms of Attention Deficit Hyperactivity Disorder (ADHD). Adderall works by changing the amounts of some natural substances present in the brain.

Adderall contains amphetamine or dextroamphetamine belongs to a class of medication drugs that are also known as stimulants. Furthermore, it can help in increasing one's ability to pay complete attention, and stay focused and put full concentration onto an activity. Additionally, it can help the patient in controlling behavior problems. In fact, it can also help you in organizing your tasks and improving the listening skills for a good performance.

Many people ask **What does Adderall do?** Well, it does help the mind by increasing the concentrating ability, so that the sufferer can easily focus on the given tasks.

When you [buy adderall online](#), one of the valid questions that arises is, **is adderall a controlled substance?** The answer is Yes! Adderall is a schedule II controlled substance in the United States. This means that it is a prescription drug with a high power to abuse on the patient.

Furthermore, another common question about Adderall is, how long does Adderall last? Well, the immediate release of Adderall lasts around four to six hours per Adderall dosage.

### **How Long Does Adderall Stay In Your System?**

Adderall lasts upto 72 to 95 hours in the urine after its usage, and upto 46 hours in blood. If we talk about blood, it stays for upto 45 hours. Furthermore, if we talk about Adderall stay in the saliva, it stays upto 20 to 50 hours, and finally adderall can stay upto three months in the hair of the patient who consumes it. The duration of Adderall in one's body can be determined through several factors such as the urine pH, weight, dose, last use, and frequency of its use.

### **How to get rid of Adderall tongue?**

Adderall can have your body show some serious side effects such as dizziness, drowsiness, headache, among other side effects as well. Adderall can have weird side effects on your tongue. And to avoid such side effects, one must:

- Stay well hydrated
- Chew sugar-free gums
- Avoid tobacco, caffeine, and alcohol.

**Adderall tongue** is the condition where one's tongue gets swelled up after consuming Adderall more than prescribed.
