We are future-ready with our own PWA Solution

NexPWA

Get the best of both worlds

Build extremely fast & user-friendly front-end for your Magento store and boost your conversions & revenue

www.nexpwa.com

NexPwa benefits

Built for Magento

Works out-of-the-box with all **Magento 2 Open-Source** and **Commerce** features.

Low Investment. Faster Go-To-Market

Leverage **NexPWA** readymade themes and built-in 3rd party integrations to go live in as quick as **2 weeks**.

One time purchase

NexPWA comes with a **one-time cost** without having to pay recurring fees for usage.

Implementation, Training & Support

Works out-of-the-box with all **Magento 2** We offer full implementation services if you require.

Customize to your Imagination

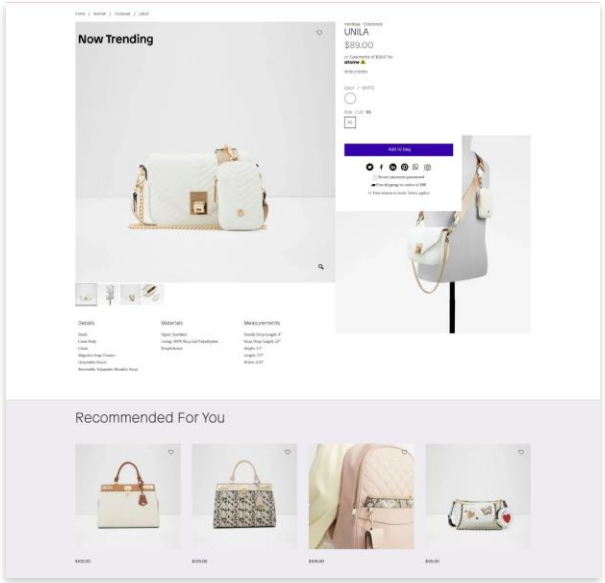

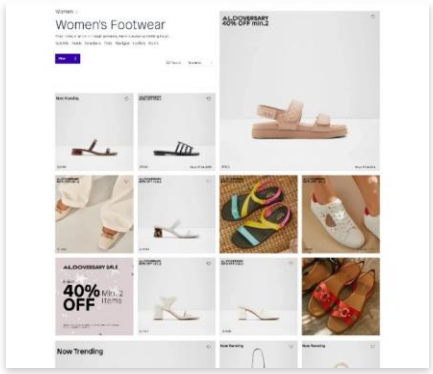

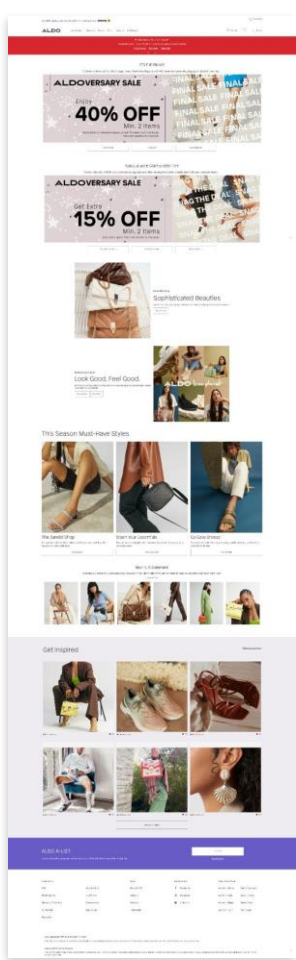

NexPWA is fully on-premise and open software (no encryption). You get full access to codebase and dev docs for customization.

No Additional Infrastructure

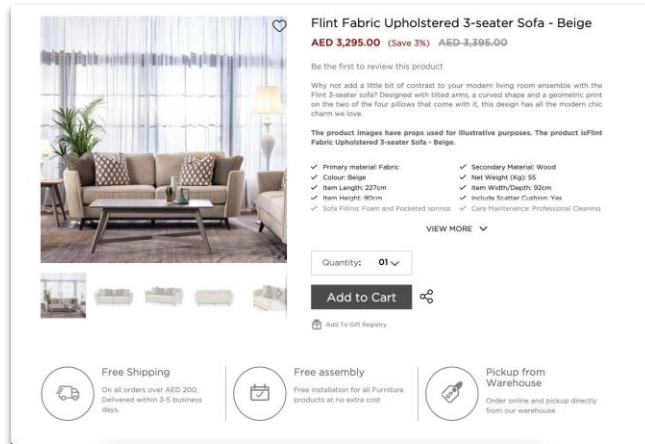

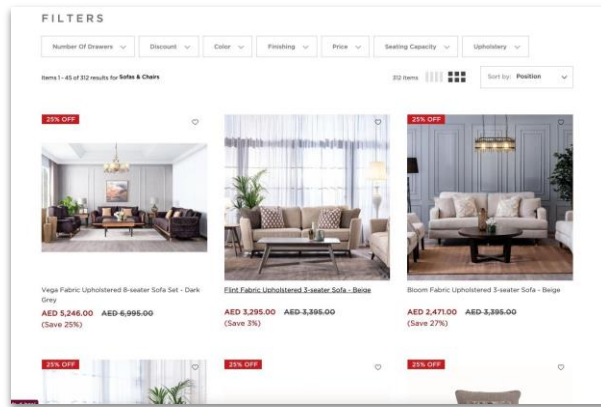

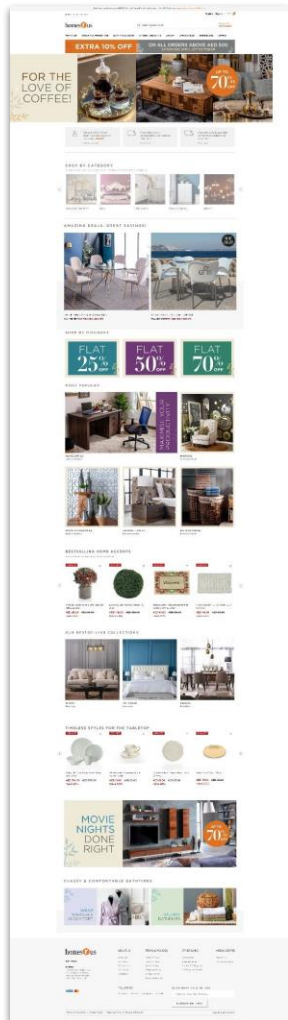

NexPWA does not require additional servers or software to run.

Work

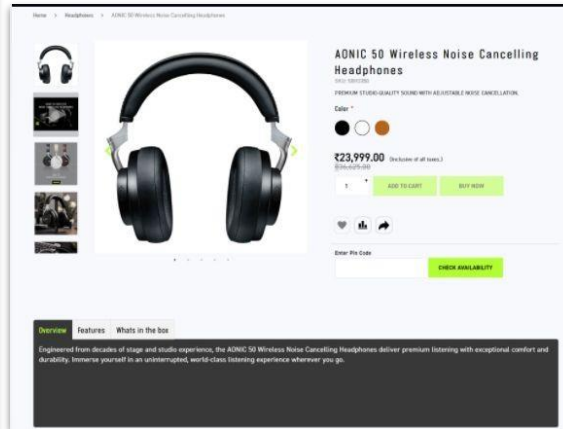

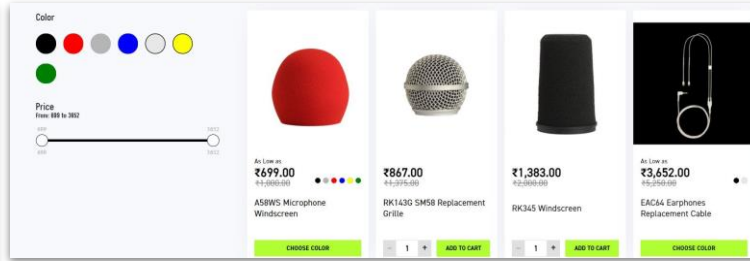

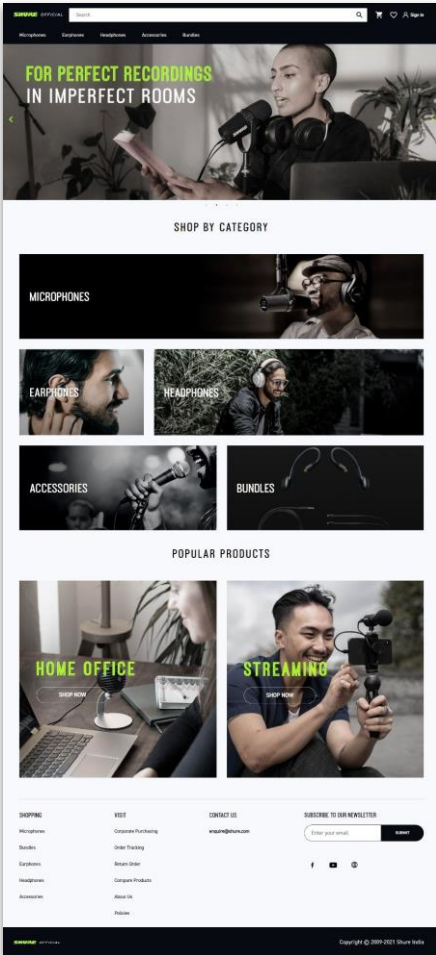

What we did

- **Magento Commerce Cloud Edition**
- **Flexible & advanced promotions integrated with Capillary Loyalty**
- **Omnichannel - Order online & pick up in store**
- **Inventory Synchronization with POS**
- **Fully Integrated with Capillary CRM with Single Sign-On**
- **Customers can schedule and send gift cards**
- **Intelligent Product Merchandising powered by Tagalys**
- **Multi-level Inventory Management**

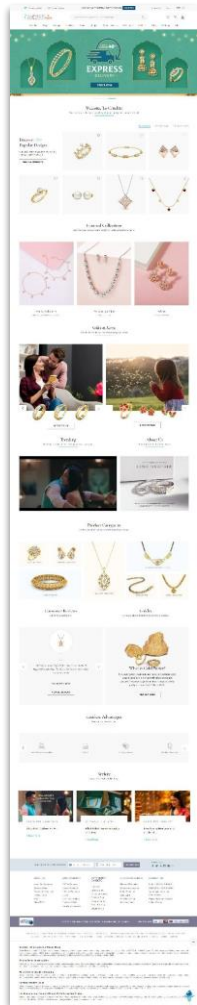

What we did

- **500+ Brands, 50000 SKUs** with ultra fast load time
- **Complete PIMCore Setup and Implementation**
- **3 months Project Delivery**
- **ERP Integration**
- **Magento Enterprise Scaling**
- **Code Quality and Architecture Audit**
- **Crisp and smooth site performance and UX**

What we did

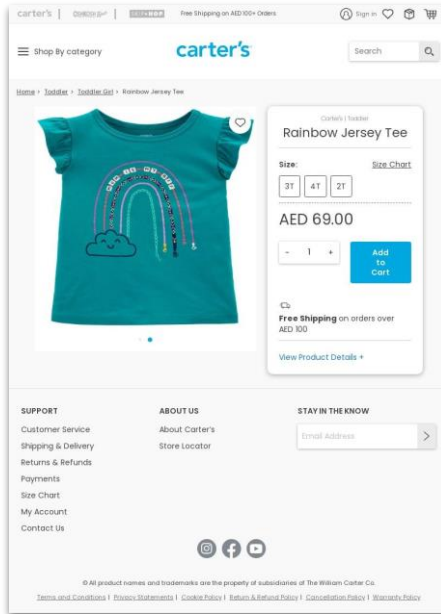

- Helped the company start their Indian eCommerce journey by setting up their new store
- Matched the global design and performance standards consistent to that of Shure's other international online stores
- PWA front-end built with NexPWA Suite
- B2B Order Form for Corporate Purchases
- Magento 2 Community Edition

What we did

- **Complex jewellery pricing logic**
- **Rapnet integration for real-time diamond pricing**
- **Multi-level discount for making charge and wastage**
- **Candere promotional wallet and refund wallet**
- **Multiple caching and load-balancing to handle high traffic**

What we did

- **500+ Brands, 50000 SKUs with ultra fast load time**
- **Complete PIMCore Setup and Implementation**
- **3 months Project Delivery**
- **ERP Integration**
- **Magento Enterprise Scaling**
- **Code Quality and Architecture Audit**
- **Crisp and smooth site performance and UX**

Some nice words...

Hashid and his team at Codilar Tech have proved to be the ideal partners for managing and updating the entire back-end of our e-commerce site amarchitrakatha.com which is based on the Magento platform. Hashid's team has always given us the desired Turn Around Times and have helped us improve the performance of our site significantly in the last year. Hashid and his team have constantly demonstrated their pro-activeness in addressing problems and kept us abreast of the latest technological enhancements that have been integral to providing the best and latest customer experience to all visitors to our e-commerce site.

**SANJAY DHAR
PRESIDENT, AMAR CHITRA KATHA**

We have worked with Codilar to successfully complete our project, the development of Featherlite e-commerce store. Our requirements were extensive and wavering, but the team worked really well to promptly deliver all the results we were expecting. Their expertise in Magento allowed us to include complex features on the site- most notably our workstation configurator that allows a customer to completely customize and visualize their product before making a purchase. They have lived up to and even exceeded all expectations we had of them.

**YUSUF MASOOD
CREATIVE HEAD, FEATHERLITE FURNITURE**

When I met the founder Hashid I could sense that he had a lot of passion for technology, and he wanted to do something very different. And he could also understand our jewellery domain. All in all, it was a good fit for us. We trusted him, and we partnered together. To reduce the page load time on the website we implemented a very streamlined process and the entire loading speed reduced to 4s, which was a huge jump for our conversion rate. It is a great experience and we have partnered with them for the last few years and it has been a fantastic partnership. I would recommend their services to a lot of players in the market.

RUPESH JAIN

CEO, CANDERE, KALYAN JEWELERS

Codilar assisted us in achieving all objectives set for our e-commerce and more. The SEO strategy assisted us to achieve all revenue targets for the year. Multiple SEO-related metrics were achieved by Codilar Technologies' work. Customers can expect insightful solutions, exceptional support, and a reliable work ethic. We are impressed with their level of professionalism and willingness to assist. Codilar was genuinely trying to improve results and was very dedicated throughout the project. They were all super helpful and made great recommendations overall.

ISABEL KOORTS

HEAD OF MARKETING & COMMUNICATION, NATIONAL MUSEUM OF QATAR

Codilar Technologies collaborated with us on the design component. It was all Magento development. They even did a phased-in approach to getting the current version of our site up and running. We've officially made them our partner of record for all of our Magento development. Codilar Technologies excels at managing expectations by taking the time to ask questions and understand requirements. Detail-oriented and organized, the team strikes an ideal balance between adhering to the original scope and remaining flexible. They maintain strong project management capabilities. They're very good at interpreting our requirements and then relaying them back to us so that we can understand what is actually possible and what will require more work than we actually thought, and then refine our deployment strategy.

RYAN MORIN
DIRECTOR OF TECHNOLOGY & MARKETING, CONCEPT CONTROLS

We could clearly see Codilar's passion for digital commerce and technology. Our years of frustration seemed very easily solvable after discussions with them. We decided to go ahead and never had to look back since then

Vijay Thiruvassagam,
