Application on any surface without primer is one of many unique features of "Elephant Shield's - Liquid Rubber®" that leverage the end user to think

beyond limit of architectural challenges while choosing waterproofing and corrosion protection solution.

In addition, Elephant Shield's - Liquid Rubber® is TOP COAT COMPATIBLE with any water-based paint to meet aesthetic requirements. Limitless Applications of Elephant Shield's - Liquid Rubber® for

Unique **Product with** Unique **Characteristics**

- Performing all over the world since 2001
- Water-based, Cold-applied
- Odorless, V.O.C Free, Follows all Green Product Regulations
- Stretch ability of over 950% with 95% Recovery
- Highest UV Stable, Will Not Deteriorate with Weather Cycle and Direct Sunlight
- Compatible with 200+ Inorganic Chemicals, Widely used for chemical storage in industries
- 1000 hrs. Salt Fog Corrosion Passed, Can perform under sea water also.
- Abrasion Resistant, Highly Impact Resistant
- High Puncture Resistant and Self-healing If Punctured
- Comfortable With Standing Water
- Single Component Liquid Coating
- Cold Applied by Brush, Squeegee or Spray Equipment
- Curing in Ambient Condition
- Forms Seamless Rubberized Membrane When Cured
- Applied Indoors and Outdoors
- No Special Protective Equipment Required
- Minimum Require Any Kind of Pre or Post Preparation of Surface
- Top coat compatibility with any water based paint or Non-toxic, cementitious work

APPLICATION IN 3 EASY STEPS

1

FIX & CLEAN IT

It is important that the surface is stable and all the roofing sheets are properly fixed. Make sure that the roof/surface is dry, matt (not glossy), free of all dust, dirt, debris, oil, solvents and other impurities before starting the application that may adversely affect Elephant Shield's - Liquid Rubber® adhesion.

2

PREPARE IT

Be ready with brush/roller, Elephant Shield's - Liquid Rubber® and Reinforcement Fabric or cotton cloth strips gathered at one place, in order to ensure a hassle-free application of Elephant Shield's - Liquid Rubber®.

3

COAT IT

Use the 3 course method with Elephant Shield's - Liquid Rubber®

- Apply the first coat of Elephant Shield's - Liquid Rubber®
- For larger Gaps, Cracks, Joints, Bolt holes, Parapet wall corner, Drainage area or Porous surface apply reinforcement fabric supplied with the buckets immediately after first coat
- Apply Second Coat of Elephant Shield's - Liquid Rubber® above Reinforcement Fabric immediately and Third coat of Elephant Shield's - Liquid Rubber® after 24 hrs
- At last apply two or three coats of Elephant Shield's - Liquid Rubber® on remaining area as per methodology and application if needed

And It's done! Your application area is now Waterproof, Damp Proof and Corrosion Proof.
You can apply more layers to extend the life of your application in future.

 Watch in Action

One Product **Limitless Applications of Liquid Rubber**

1. Waterproofing of Roof or Terrace (Metal, Wood, RCC, Asbestos/Cement/G.I. Sheet, Stone, etc. Almost any material)
2. Positive side Wall and Terrace damp proofing
3. Waterproofing of Landscaping
4. Waterproofing of Gutter Joints, Slab Joints, and Expansion Joints
5. Corrosion protection of the outdoor structure
6. Anti-corrosion Treatment of Metal Structure and underground utility overlap
7. Water Proofing of Basement, Bathroom, and Water Features during construction
8. Joints between structure and Inter-floor Waterproofing during construction
9. Waterproofing of Foundation, Underground Structure, and Retaining Walls
10. Above ground pond waterproofing
11. Balcony waterproofing
12. Waterproofing of Vertical walls and Metal/Polycarbonate sheet joints

Customer Reviews

I used this liquid rubber to stop leakage for a water pond. Pond was with smooth plaster surface & had hair line cracks , was not able to know the leakage points. This product stopped the leakage. It actually works like a rubber sheet.

Mr. Amit

I have some seepage issue in my house. I tried various vendors who did water proofing treatment. The seepage always came back. I recently used this product and it is working well so far. As the monsoons are going to start soon, hope the rubber coat continues to work.

Mr. Mridul Deka
