👋 Hi! Find your queries here!

## Who We Are

Elephant Shield presents a high-performance solution created with breakthrough technology from Canada that delivers **beyond limit** of traditional coating.

We believe in innovation and going the extra mile to discover solutions that should be simple to implement and make our lives easier and better. At Elephant Shield, we are continuously working to go **beyond limit** in creating and providing solutions for waterproofing, corrosion control, chemical protection, and air barrier coatings that improve your quality of business and life.

---

## Integrity

For us, you come first. Right from our employees and distributors to industrial and corporate customers we keep the communication honest and transparent, understand their needs and provide a win-win solution.

## A Conscious Approach

The success of Elephant Shield is attributed to its team's ability to learn and adapt to new challenges and evaluate each project at every step of providing an end-to-end solution – understanding customers' requirements, providing the best coating options, implementing the process and customer service, so that it enhances the quality of business.

---

## Quality Policy

We follow international quality norms to ensure that the best quality material is used for application purposes. Our products are tested under severe conditions and on live sites to ensure the best results. They are certified by various international laboratories. Elephant Shield Liquid Rubber has successfully performed for the last two decades in cold & freezing countries like the USA, Canada, and Europe and in hot & harsh climate countries like UAE, Saudi Arabia, Iran, Oman, and Australia.

---

## Customer Satisfaction

The key value that drives our business is complete customer satisfaction. Our product, processes, and services are evolving to provide customized solutions and a seamless user experience to our customers.
