

SIX FACTS ABOUT DENTAL VENEERS

The Caringbah Dentists

DENTAL VENEERS ARE A FIX-ALL SOLUTION TO ACHIEVE A DESIRABLE SMILE.

Dental veneers are a thin, tooth-coloured cap or shell that covers the outside of your existing tooth.

ALL DENTAL VENEERS ARE CUSTOM DESIGNED TO SUIT YOUR UNIQUE SMILE.

To ensure the veneers fit perfectly in your mouth, they are custom made to suit the shape of your existing teeth.

DENTAL VENEERS ARE MADE FROM SAFE MATERIALS.

Most dental veneer at a dentist near me is made from porcelain or other composite materials, which are safe in your mouth and provide ideal comfort.

VENEERS ARE CONSIDERED A PERMANENT PROCEDURE.

Some porcelain veneers may need to be replaced at some point throughout your life, however the procedure is considered to be permanent.

MOST DENTAL VENEERS WILL LAST ABOUT 10 YEARS.

While most dental veneers will need replacement around 10 years after being bonded, some can still look great after 20 years.

VENEERS CAN COVER CHIPS, STAINING, CRACKS, AND MINOR MISALIGNMENT.

The reason that dental veneers have become so popular is because they can cover a range of cosmetic issues and present a desirable smile. It's a solution for a complete smile makeover!
